(54) Title: **DEVICE AND METHOD FOR ARRANGING A LONGLINE INCLUDING BAIT IN A LONGLINE CONTAINER**

Detail B

Detail D

(57) Abstract: The invention refers to a method for transferral of a longline hook with bait (5) from a baiting machine (6) into a longline container (12), where the hook is connected to the longline (3) via a snood (4), as the longline (3) is set up to be arranged in a longline chamber in the longline container while the hook/bait (5) is transferred to a hook/bait chamber (16) adjacent to the longline chamber. The method according to the invention is characterised in that, as the longline (3) is conducted from the baiting machine to the longline chamber via a conductor device, the hook with bait (5) is simultaneously transferred in an initial manoeuvre to a holder (8), as the holder (8) with the hook/bait (5) is located at an intermediate station directly above the longline container (12), or is transferred to such an intermediate station and then transferred via a conductor device from the holder to the hook/bait chamber (16) in the longline container. The invention also refers to a device for execution of the method.
